

SUNFLOWER SPOTLIGHT

Quality Care Services, Inc.

Brooke Wolf, Executive Director of Quality Care Services, Inc. a home sponsoring organization in Kansas developed the Convenience Product Commitment to aid home providers in navigating the use of Child Nutrition (CN) labeled products in their programs. Staff at Quality Care Services gathered CN labels and Product Formulation statements for popular CN labeled convenience products served among providers and developed an approved list that providers could find in common retail establishments. Quantities required to be served of each product to meet the meal pattern requirements were also provided as part of the convenience product approved list. KSDE applauds this innovative approach to working with CN labels in the home setting.

Convenience Product Commitment 2016

Provider Name: _____ Date: _____

Foods such as Chicken Nuggets, Corn Dogs, and Fish Sticks, Pizza, and Ravioli are considered to be a convenience product. All of these products must be CN Labeled. For many of you, it will result in calling the specific manufactures and requesting a "Product Formulation Sheet" that informs you exactly how much each serving has of meat/meat alternate and or breading. Listed below are the foods that Quality Care Services will provide annually to you. Should you choose to use additional products, you will be required to supply the information to us. Even If the information is supplied the convenience product may still not be "creditable"; this could result in the meal being disallowed.

Please Select from the below options for the Convenience Products used in your home. This form must be returned to Quality Care Services, Inc. by November 15, 2015 for convenience products listed on your October 2015 menu to be allowed.
