It has been noted that there appears to be significantly more block groups contained in the 0-12 special census tabulation done by FRAC than were in the 0-18 tabulation previously distributed. FRAC indicates that the reason for this is that the 0-12 tabulation is formatted somewhat differently, but contains the same block groups as the previous 0-18 tabulation. The 0-12 tabulation contains a column titled "Place", which lists the town or city where the block group is located. For those block groups that are located in more than one municipality, the 0-12 tabulation lists the block group twice, once under each municipality.
