SFSP-196

Subject: Use of 1990 Census Data to Document Site Eligibility in the 1993 Summer Food Service Program (SFSP)

To: STATE AGENCY DIRECTORS
(Special Nutrition Programs)

- Colorado ED, Iowa, Kansas, Missouri DH,
- Montana OPI, Nebraska ED, North Dakota,
- South Dakota, Utah, and Wyoming DHSS

There have been numerous reports on the difficulty of obtaining 1990 census tract data to document SFSP site eligibility. The Census Bureau has indicated that the 1990 updates of the printed books and tables referenced in the 1993 Sponsor's Handbook will not be published or widely available until the middle or end of summer. When these data become available in printed form, they will appear in CPH-3 (Census of Population and Housing, part 3).

We are providing information in the three attachments which may assist where there is still a problem establishing the eligibility of a site. Attachment 1 lists each census tract or block numbering area (BNA) in your state in which at least 50 percent of all persons are below 185 percent of poverty. The information in the third column could be used if the sponsor knows the specific census tract or BNA number in which the site is located. Columns 4-7 should be ignored since they only contain estimates on the number of children in various age groups. Use of data from Attachment 1 can only be used in the 1993 SFSP. The Child Nutrition Division will be working with the Census Bureau before the 1994 SFSP to gain access to data sources which are currently unavailable.

Attachment 2 discusses the data contained in two summary tape files, STF-3A and STF-4A, and Attachment 3 lists state data centers and Federal depository libraries where the STFs are available.

We hope this information may be of assistance to you and your sponsors. If you have any questions regarding this information, please contact a member of my staff at (303) 844-0359.

Darlene Sanchez
ANN C. HECTOR
Regional Director
Special Nutrition Programs

USE OF 1990 CENSUS DATA IN THE 1993 SFSP

The printed 1990 census data which will eventually appear in the CPH, parts 1-6, is a subset of more complete data in computerized, summary tape files (STFs) released by the Census Bureau. This memorandum will discuss the data contained in two summary tape files, STF-3A and STF-4A, which would seem to have the most potential for use by sponsors in documenting SFSP site eligibility when the information in Attachment 1 does not appear to support a prospective site's eligibility.

These STFs are always available in "state data centers", which are state organizations (usually located in state agencies or state universities) that cooperate with the Bureau of the Census in making decennial and other census products available to state and local users. In addition, some "federal depository libraries" also receive STFs from the census bureau and have the technological capability to reproduce the data in these files at nominal or no cost. A list of state data centers (listed as the "lead agency" in each state) and federal depository libraries for the states in your region are enclosed as Attachment 3. Those federal depository libraries marked with an asterisk (*) choose to receive at least some Census Bureau publications and are considered to be a part of the "Census Depository Library System".

There are several potential problems which sponsors will face when attempting to use the data contained in STF-3A and 4A:

1. The data in STF-3A are accessible only through the use of "CD-ROM" technology, which is not necessarily available to most sponsors or at the smaller federal depository libraries;

2. The data in STF-4A are accessible on computer tapes only (i.e., it cannot be accessed on CD-ROM) and, as of now, are available only for the states of Alaska, Arizona, Connecticut, Delaware, Maryland, New Jersey, New Mexico, Virginia, and Vermont;

3. State data centers and depository libraries may vary greatly in their ability to provide information quickly, in their CD-ROM or tape-reading capability, and in the prices charged to users; and
(4) STF-3A data on children are broken out only at the poverty level (i.e., at 100 percent of poverty), and are therefore of limited or no utility in documenting SFSP site eligibility. When using data from STF-3A, sponsors would therefore be forced to obtain information on the income poverty status of all persons, rather than children alone.

Although Attachment 1, column 3, identifies each census tract or BNA within your region in which at least 50 percent of all persons are below 185 percent of poverty, STF-3A also includes block group level information on the income poverty status of all persons, broken out at 185 percent of poverty. (NOTE: A census tract numbers 4,000 people on average, a block group about 800. Census tracts are subdivided into block groups on STF-3A, as are some BNAs.) It is quite likely that some census tracts not listed in Attachment 1 have within them "pockets of poverty" in which 50 percent or more of the persons are below 185 percent of poverty. The block group data in STF-3A could be useful in identifying such areas.

Finally, if the sponsor is located in one of the nine states for which STF-4A data are available, they may wish to contact a data center or depository library to see if they are willing to print out information from STF-4A. STF-4A includes information in "disaggregated form" (i.e., users would have to add up numbers of children in various age groups) on the income poverty status of children, broken out at 185 percent of poverty, at the tract/BNA and block group levels. Although the age groupings in these tables would make it impossible to capture precise data on the poverty of 18-year olds, their low participation at sites would seem to render this an unimportant shortcoming in the data.

Because STF-4A contains precise information on the income poverty status of children, STF-4A is thus superior to STF-3A for documenting SFSP site eligibility, except for the fact that it is only accessible on tape and is currently available for only nine states. As stated in the cover memo, we believe that the data in STF-4A may be an extremely fruitful source of site eligibility information for the 1994 SFSP, and we will be working with Census to determine if we can improve sponsor accessibility to the data in this tape.
the work of the SDC’s. They focus especially on economic data and assistance to businesses and economic development agencies in their State. See chapter 7 for additional information about the SDC and BID Programs.

All States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and Guam have SDC programs. Many have also established BIDC programs. The programs have designated lead agencies, coordinating agencies, and affiliates. In the following joint listing, SDC participants are identified by “(SDC)” at the end of an entry. Organizations that are both SDC and BIDC participants are noted similarly: “(SDC/BIDC).”

NATIONAL CLEARINGHOUSE

The letters following the telephone numbers of organizations in the National Clearinghouse for Census Data Services indicate the services provided by the organization. The following list indicates which data holdings the code letter represents.

Service Codes
A. General services
b—Tape copies, printouts, extracts
b—Software for accessing census data
b—Personal computer services: downloading, etc.
b—Online data services
e—CD-ROM products and services
f—Estimates and projections
f—Tabulations from microdata
h—Market segmentation
i—Other market research services
j—Training/consulting

B. Data specialization
a—Demographic/econometric
b—ZIP code information
c—Economic—retail trade
d—Economic—foreign trade
e—Economic—other

C. Data holdings
a—National data
b—Regional data
c—Local data

FEDERAL DEPOSITORY LIBRARIES

Note—Listed below are depository libraries of two kinds, sponsored by the Federal Government. The first kind belong to the U.S. Government Depository Library System. They do not necessarily choose to receive Census Bureau publications. The second kind, marked with an asterisk (*), belong to the Census Depository Library System. They receive at least some Census Bureau publications.

For any listing, we recommend you call ahead to learn if a library is likely to have the publications you need. Holdings at the U.S. Census Bureau Library in Suitland, MD are complete; however, reference services are primarily for Census Bureau researchers. For more information about depository libraries, see chapter 7.

Alabama
Anniston—Public Library of Anniston and Calhoun County
Auburn—Auburn University, Ralph Brown Draughon Library

FEDERAL STATISTICAL REPORTS BY AGENCY

This section is designed to familiarize users of the Guide with key statistical programs and publications of other Federal agencies. Since only selected reports are noted, some readers may want to contact the agencies for more comprehensive lists of their publications. Also, there are additional Federal agencies that offer statistical information listed in the next section. Other Federal Sources of Statistics. While many publications can be ordered through the Government Printing Office (GPO), some must be ordered directly from the individual agencies.

Bureau of Economic Analysis

The Bureau of Economic Analysis (BEA), an agency of the Economics and Statistics Administration (ESA), under the Department of Commerce, provides statistics on economic growth, inflation, regional development, and the Nation's role in the world economy.

BEA's current regional, national, and international estimates first appear in the form of news releases. This information is available on recorded telephone messages, online through the Economic Bulletin Board, and in printed reports.

Recorded telephone messages briefly (in 3-5 minutes) summarize key estimates immediately after their release. The usual time of release (eastern standard or eastern daylight time) and the telephone numbers to call outlined here. Leading indicators (8:30 a.m. 202-896-2450), the message is updated weekly on Monday, to include available component data that will be passed on to the next release. Existing market data, including projections, recent releases, and model results, are available on the Bulletin Board.

The Economic Bulletin Board provides access to computer access to news releases and other information and is maintained by the E Office of Business Analysis (OBA). News releases are available on the Bulletin Board shortly after their release. Selected estimates, articles, and publications are available. The Bulletin Board may be accessed by personal computer, telephone terminal, or word processor equipped with a modem; the information available (which includes information from several Federal agencies) may either be received on the telephone or downloaded. This service is available from (OBA). A $35.00 installation fee covers 2 hours of on-site time; additional time is charged by the minute. Instant hook-up is available. For more information, call OBA 202-377-1966.

Publications listed below are available in either BEA or GPO (Government Printing Office, Superintendent of Documents). Six sets of BEA Reports are current in the BEA News releases for the following areas: gross domestic product, personal income and outlays, regional income and outlays, and national and international reports, and component lead, coincident, and lagging economic indicators. These reports are available as a set, which is included among reports, both BEA and GPO, for $10.00 per year. Subsets also are available individually as described below. For more information on BEA's programs, products, and services, contact the Public Information Office, 200 Constitution Avenue NW, Washington, D.C. 20230; 202-523-0777. A User's Guide to BEA Reports lists the most recently released and most frequently requested products and services from BEA. Single copies are available from the Public Information Office.

BEA Reports: Gross Domestic Product

These monthly reports, with summary information, are available from BEA. National Income and Product Account estimates feature GDP and corporate profits. Reports are mailed the day after estimates are released. Available from BEA by subscription. Accession No. 53-91-11-018, $24.00 per year.

BEA Reports: Personal Income and Outlay

These monthly reports with summary information, National Income and Product Account estimates feature personal income and outlays. Reports are mailed the day after estimates are released. Available from BEA by subscription. Accession No. 53-91-11-014, $24.00 per year.
